Description

Find out what Sun's license covers and refer to it in COPYING like everything else GROMACS re-uses under license.

Revision 33b66f8a - 11/26/2013 05:10 PM - Mark Abraham

Add license for Sun XDR routines

I can find no distribution from Sun, and the original GROMACS import does not reproduce a copyright statement, if one existed. If this ever proves to be a problem, we can replace these routines with LGPL alternatives.

Fixes #1241

- Target version changed from 4.6.x to 5.0

This seems nasty - there was no actual copyright statement preserved in Erik's original commit. WWW seems to have some doubt about whether this code is released under a legally dependable license. If this ever becomes an issue, we should probably switch to the LGPL.
