GCC-4.6.1 is buggy for AVX_256

User reported problem on mailing list with the above combination. SSE4.1 worked on his hardware. Likely http://gcc.gnu.org/bugzilla/show_bug.cgi?id=49002 is to blame, fixed in gcc-4.6.2.

Hopefully Vishar will report back that he succeeded with AVX_256 and a more recent compiler, and we can prevent this build combination.
