Gromacs - Bug #1289

EEL_USER is true when eelPMESWITCH is true

06/23/2013 09:37 PM - Mark Abraham

Status: Closed
Priority: Low
Assignee: Mark Abraham
Category: mdrun
Target version: 4.6.4
Affected version - extra info: 4.6-4.6.2

Affected version: 4.6.2

Description
The monster Verlet kernel patch included
#define EEL_USER(e) ((e) == eelUSER || (e) == eelPMEUSER || (e) == (eelPMESWITCH))

(see http://redmine.gromacs.org/projects/gromacs/repository/revisions/release-4-6/entry/include/types/enums.h#L120)

I think it should be
#define EEL_USER(e) ((e) == eelUSER || (e) == eelPMEUSER || (e) == (eelPMESWITCH))

Associated revisions
Revision 242f9f63 - 07/01/2013 08:04 PM - Mark Abraham
Corrected definition of EEL_USER

Looks like a copy-paste typo occurred at some point in the nbnxn development. EEL_USER is only used in runner.c, and only to issue a fatal error with user-supplied non-bonded potentials. That clearly should not be applicable to eelPMESWITCH.

Fixes #1289

11/19/2015 1/2
- Affected version - extra info set to 4.6-4.6.2

Was fixed in https://gerrit.gromacs.org/#/c/2459/ for 4.6.3 (not possible to set that target version any longer). For some reason, the commit wasn't linked here.

#5 - 08/13/2013 08:55 PM - Mark Abraham
- % Done changed from 0 to 100

Applied in changeset 2429f63993333b6a13f6c237a7074597e996567.

#6 - 10/16/2013 03:36 PM - Mark Abraham
- Status changed from Resolved to Closed
- Target version changed from 4.6.x to 4.6.4
