GROMACS - Bug #1406

trjconv -t0 -b leads to frame skipping

12/12/2013 06:10 PM - Chris Neale

**Status:** Closed

**Priority:** Normal

**Assignee:** Roland Schulz

**Category:** core library

**Target version:** 4.6.x

**Affected version - extra info:** 4.6.1, 4.6.3, 4.6.5

**Difficulty:** uncategorized

**Affected version:** 4.6.5

### Description

I want to extract a section from a .xtc using trjconv -t0 -e and then reset the time to start at 0.

When I try to do it in a single trjconv step, it does reset the starting time, but it also only print every second step.

For example, I might do this to extract and retime, then check the timing using g_traj:

```
trjconv -f MD.xtc -o out.xtc -b 2 -t0 0
echo 0 | g_traj -f out.xtc -s MD.tpr -ob box.xvg
rm -f out.xtc
```

The output in box.xvg is:

```
0    2.99635    2.99635    2.99453    0    0    0
0.4    2.99835    2.99835    2.99643    0    0    0
0.8    2.99916    2.99916    2.99691    0    0    0
...
```

But if I remove the -t0 flag to trjconv, I get:

```
2    2.99635    2.99635    2.99453    0    0    0
2.2    2.99709    2.99709    2.99581    0    0    0
2.4    2.99835    2.99835    2.99643    0    0    0
```

Note that the workaround is to do the -b and -t0 in two steps.

I suspect that this is related to issue 1405

I tested 4.6.1-4.6.5, all of which show the issue. When testing 4.5.5, 4.0.7, and 3.3.3, I ran into issue 1405 even with "-b 2" so was unable to be sure how recent this issue is.

### Associated revisions

- Revision 81d10b25 - 06/20/2014 12:36 PM - Roland Schulz
  
  Fix that seeking was wrong if frame time was modified.

  The trjconv -t0 option causes fr->time to be modified and this then causes the skipping to be incorrect. Alternative we could document that fr->time shouldn't be modified and change that trjconv makes a copy of fr before changing time. This change has the advantage it is less likely to reintroduce the problem.

  Fixes #1405, #1406

- Revision fa0aef8b - 11/26/2014 06:33 PM - Mark Abraham

  Fix trjconv modifying fr.time unnecessarily
The was a bug where trjconv modified the input frame time, which caused issues with xtc seeking. This has recently been fixed by commit 81d10b25, but it's better not to mess with the input frame and only modify the output frame.
