In gmx_rama.c, should probably protect:

```
fprintf(out, "@    xaxis  tick on\n@    xaxis  tick major 60\n@    xaxis  tick minor 30\n");
fprintf(out, "@    yaxis  tick on\n@    yaxis  tick major 60\n@    yaxis  tick minor 30\n");
```

with:

```
if (output_env_get_print_xvgr_codes(oenv))
```

Same thing goes for the following code in gmx_chi.c:

```
fprintf(fp, "# this effort to set graph size fails unless you run with -autoscale none or -autoscale y flags\n");
fprintf(fp, "@ xaxis tick on\n");
fprintf(fp, "@ xaxis tick major 90\n");
fprintf(fp, "@ xaxis tick minor 30\n");
fprintf(fp, "@ xaxis ticklabel prec 0\n");
fprintf(fp, "@ yaxis tick off\n");
fprintf(fp, "@ yaxis ticklabel off\n");
```

I didn’t check all analysis tools, but the same problem likely exists elsewhere as well.
