**GROMACS - Bug #1479**

**g_rama and g_chi print some xvg headers even when -xvg none is set**

04/11/2014 04:55 PM - Chris Neale

**Description**

In gmx_rama.c, should probably protect:

```c
fprintf(out, "@ xaxis tick on\n" );
fprintf(out, "@ xaxis tick major 60\n" );
fprintf(out, "@ xaxis tick minor 30\n" );
fprintf(out, "@ yaxis tick on\n" );
fprintf(out, "@ yaxis tick major 60\n" );
fprintf(out, "@ yaxis tick minor 30\n" );
fprintf(out, "@ s0 symbol 2\n" );
fprintf(out, "@ s0 symbol size 0.4\n" );
fprintf(out, "@ s0 symbol fill 1\n" );
```

with:

```c
if (output_env_get_print_xvgr_codes(oenv))
```

Same thing goes for the following code in gmx_chi.c:

```c
fprintf(fp, "# this effort to set graph size fails unless you run with -autoscale none or -autoscale y flags\n");
fprintf(fp, "@ xaxis tick on\n");
fprintf(fp, "@ xaxis tick major 90\n");
fprintf(fp, "@ xaxis tick minor 30\n");
fprintf(fp, "@ xaxis ticklabel prec 0\n");
fprintf(fp, "@ yaxis tick off\n");
fprintf(fp, "@ yaxis ticklabel off\n");
fprintf(fp, "@ type xy\n");
```

I didn't check all analysis tools, but the same problem likely exists elsewhere as well.

**Related issues:**

**Associated revisions**

Revision 82f6f587 - 06/11/2014 08:43 PM - Erik Lindahl

Avoid writing xvgr formatting with -xvg none.

Several tools were writing xvgr formatting code directly to output files, even when the users selects -xvg none as a command line option.

Fixes #1407, #1479.
