

GROMACS - Task #2864

Building incompatibilities

02/18/2019 03:57 PM - Benson Muite

Difficulty:	uncategorized	
Description		
<p>There seems to be an error when building Gromacs 2018.5 on Fedora for x86-64 architecture with OpenMPI 4: https://koji.fedoraproject.org/koji/buildinfo?buildID=1209606 The GPU test fails. Most likely due to infrastructure choices, but may be an issue elsewhere. Maybe worth setting up monitoring of GROMACS builds on Fedora and other similar platforms, could reduce testing.</p>
