

GROMACS - Bug #440

Double precision man pages are installed as program_d.1

06/16/2010 12:12 AM - David van der Spoel

| Description | |
| I would like to propose that double precision versions (or mpi versions) of program man pages are installed as grompp.1 rather than grompp_mpi_d.1 | |
| Objections? | |

No objection whatsoever, but it will require rewriting quite a bit of code to generate non-suffixed names. I've remarked it enhancement since I don't think we'll do it in 4.5.

#2 - 09/01/2010 10:22 PM - David van der Spoel

Let it be. Not worth the trouble, as long as we have "normal" names in (binary) distributions.
