Gromacs - Task #673
Reorganize code from src/ngmx/

**Description**
Move code for programs that are built from src/ngmx/ into separate subdirectories under src/programs/ and update CMake files accordingly. It remains to be decided where code used in multiple programs should go. There is also some dead code in the directory (e.g., g_highway.c) that should be cleaned up.

**Associated revisions**

**Revision ff0af6b2 - 07/03/2013 07:51 PM - Teemu Murtola**
Remove g_highway and vbox.c.

- g_highway hasn't been included in the build for a long time (never for CMake), so I don't think anyone will miss it. No need to keep it up to date with changes done in program initialization for the wrapper binary.

- vbox.c seems unused.

- There are some other source files under src/ngmx/ that contain a main() and are not included in the current build, but those seem some kind of test programs, and don't seem to use much outside src/ngmx/; so left them alone for now.

  Related to #673.

**Revision 3beddf1e - 09/21/2013 06:00 AM - David van der Spoel**
Moved ngmx to C++, renamed it to view.

- Part of #673
- Moved all files to src/programs/view and made executable part of the gmx binary as "gmx view".
- Removed warnings.
- Replacing min and max by std::min and std::max.
- Removed warning in asize macro.
- Changed typedef enums to C++ enums.
- Changed gmx_bool to bool.
- Removed g_showcol, g_xrama, xstat, test_ngmx_dialog

History

#1 - 09/15/2013 07:07 AM - Teemu Murtola
- Status changed from New to Fix uploaded
- Assignee set to David van der Spoel
- Target version set to 5.0

Done in https://gerrit.gromacs.org/#/c/2581/. What remains is making ngmx part of the wrapper binary, but that is not exactly part of this issue.

#2 - 09/21/2013 06:01 AM - Teemu Murtola
- Status changed from Fix uploaded to Resolved

Also the wrapper binary part done in the linked commit.

#3 - 12/16/2013 05:37 PM - Rossen Apostolov
- Status changed from Resolved to Closed

#4 - 02/15/2014 09:38 PM - Teemu Murtola
- Project changed from Source code reorganization to Gromacs
- Category set to build system
