Add Doxygen documentation on the web page

01/22/2011 06:53 PM - Teemu Murtola

Status: Closed
Priority: Low
Assignee: documentation
Category: documentation

Difficulty: uncategorized

Description

Once we have proper Doxygen documentation, it would be good to have it automatically placed on a web page. There should be separate pages for at least the latest released version and for the current master branch. If there will be a build server, it could automatically regenerate the documentation, e.g., during nightly builds.

This can wait until some cleanup of the existing documentation has been done; will add that task as blocking this one.

Well, apparently I can't add that link, so the task that contains the cleanup of the existing documentation is #662.

#2 - 03/13/2012 10:41 PM - Roland Schulz
It is available for the master branch at http://jenkins.gromacs.org/job/Build_Doxygen/javadoc/. It will be extremely simple to add an additional job to generate it for releases. The jenkins job can be simply copied. The only difference will be that it would not be triggered by git changes, instead it would be triggered manual (direct or indirect trough another job which is triggered manual).

I think this can be closed now, but I don't have the necessary rights.

#4 - 08/06/2012 09:16 AM - Roland Schulz
I agree and also don't have permissions.

#5 - 12/30/2012 07:24 AM - Teemu Murtola
Please, someone with permissions close this issue.

#6 - 12/30/2012 08:06 AM - Roland Schulz
- Status changed from New to Closed

Also, I just gave myself and you the permission.

#7 - 05/23/2014 02:02 PM - Rossen Apostolov
- Project changed from Documentation to GROMACS
- Category set to documentation

the issue was moved to project "Gromacs", category "documentation", and the original sub-project "Documentation" was removed.
