

GROMACS - Bug #847

tpbconv with index file can produce incorrect tpr files

11/27/2011 01:00 PM - David van der Spoel

Status: Rejected	
Priority: Normal	
Assignee:	
Category:	
Target version: 4.6	
Affected version - extra info:	Difficulty: uncategorized
Affected version:	
Description If an index file to tpbconv is used to make a subset of a tpr file, errors in the residue index will be introduced if the index is not continuous. Will upload an example later.	

History

#1 - 04/12/2012 11:14 AM - Rossen Apostolov

- Target version set to 4.5.6

Do you want to have this fixed for 4.5.6?

#2 - 04/12/2012 03:16 PM - David van der Spoel

- Target version changed from 4.5.6 to 4.6

No this is quite an obscure bug.

#3 - 08/05/2012 01:27 AM - Roland Schulz

- Status changed from New to Feedback wanted

example missing

#4 - 12/29/2012 12:18 AM - Erik Lindahl

- Status changed from Feedback wanted to Rejected

Closed due to lacking feedback. David, reopen when you upload an example.
