

GROMACS - Bug #2

Intel compiler floating-point warnings

08/30/2005 12:43 AM - Erik Lindahl

Status: Closed	
Priority: Low	
Assignee: Erik Lindahl	
Category: mdrun	
Target version: CVS	
Affected version - extra info:	Difficulty: uncategorized
Affected version:	
Description	
The intel compiler warns about fp comparisons being unprecise in multiple files, and about floating point underflow in gmx_arpack.c.	
This does not cause any errors as far as I know, but should nevertheless be fixed to avoid future ones.
