Do not use conf-man.py for non-manpage doc builds

Avoid importing conf-man.py for Sphinx invocations that do not build man pages. Since it only specifies man page build rules, it is not necessary, and some of the targets do not have dependencies that would ensure that it is present.

Fixes #2184.

Some of the sphinx targets need make man before the conf-man.py is built. The install guide doesn't need it, but i'm not sure if there's a good fix.
