GROMACS - Bug #2407
Incorrect grompp net charge warning
02/13/2018 12:55 PM - Berk Hess

Status: Closed
Priority: Normal
Assignee: Berk Hess
Category: preprocessing (pdb2gmx,grompp)
Target version: 2018.1
Affected version - extra info:
Affected version: 2016

Description
Grompp only sums the charges over the molecule blocks in the system up to molecule type count and not to the molecule block count. So if the same molecule type appears in multiple, non-consecutive molecule blocks, the total charge sum can be incorrect when there are molecules with net charge.

Associated revisions
Revision 8289af3b - 02/14/2018 09:57 AM - Berk Hess
Fix grompp net charge check
The grompp check for the net charge would ignore molecule blocks at the end when molecule types are used in multiple, non-consecutive molecule blocks.
Fixes #2407
