

GROMACS - Task #2519

Feature # 2054 (Accepted): PME on GPU

Task # 2453 (Resolved): PME OpenCL porting effort

Improve/remove PME OpenCL kernel barriers

05/24/2018 05:00 PM - Aleksei lupinov

Status:	New
Priority:	High
Assignee:

Target version:	
Difficulty:	hard
Description PME OpenCL kernels currently have additional synchronisation points, as compared to CUDA ones. Some of those barriers should probably depend on minimal execution width (e.g. subgroup size?). It might also be that some are needed at all. The purpose of this issue is to track all of them. Relaxing any barrier requires rerunning Ewald unit tests on all supported and relevant platforms. Hence it is probably beneficial achieve correctness on Intel GPUs first and only then start changing the barriers.

Associated revisions

Revision b7afddb8 - 03/05/2019 08:56 PM - Szilárd Páll

Relax OpenCL gather kernel barrier on AMD

Not needed on arch with >32 execution width.

Revision a19dd7d5 - 08/15/2019 09:46 PM - Szilárd Páll

Fix OpenCL gather reduction

On >=16-wide execution it is correct (narrower is checked and excluded during compilation).

TODO: Consider changing the default on NVIDIA & Intel where offloading PME is generally not advantageous to performance.
