

GROMACS - Bug #397

g_wham error message wrong

02/14/2010 09:38 PM - Jochen Hub

Status: Closed	
Priority: Normal	
Assignee: Erik Lindahl	
Category: analysis tools	
Target version: 4.0	
Affected version - extra info:	Difficulty: uncategorized
Affected version:	
Description	
In the lines in gmx_wham.c	
<pre>if (ir.ePull != epullUMBRELLA) gmx_fatal(FARGS, "This is not a tpr of an umbrella simulation. Found ir.ePull = %s\n", epullg_names[ir.ePull]);</pre>	
The epullg_names pointer should be replaced by epull_names, otherwise the error message gets wrong.	
Cheers, Jochen
