<b>Description</b>	
As reported on the gmx-users list ( <a href="http://lists.gromacs.org/pipermail/gmx-users/2010-December/056542.html">http://lists.gromacs.org/pipermail/gmx-users/2010-December/056542.html</a> ), the fact that LSN is missing from residuetypes.dat breaks CMAP later in the grompp step. The fix is trivial - add LSN to residuetypes.dat.
